

1/4 power only ENOUGH for cutting!!

LONG upper blade
and
SHORT lower blade
boost the effectiveness
of the cutting.

Anti-glue blade keeps the surface of blade from sticky.

This scissors was born under Co-development with the long (100 years) established Japanese scissor's company. The craftsman controls the most important process of the production to enable to gain the sharpest performance and high quality.

Fluorine Coating

NH-HT175M
Titanium coating

Standard
Leaves no adhesive residue due to Anti-Glue Blade!

Fluorine Coating
Resist rust, stain-resistant & anti stick blade

Titanium Coating
Hardness & Durability UP!!

Why less power is enough?
This scissors cut any papers on an angle, then, cutting time takes longer. This boosts the effectiveness of the cutting. In addition, upper blade is longer than lower blade. Those two blades are joined in such a way that the cutting edges slide against each other.
